Rankings of Sociology Graduate Programs

The data below are from the National Research Council's 1994 study *Research-Doctorate Change*. Copies of the full report may be obtained from the National Academy Press online. Further information about the study's methodology can be found here. *These are the most recent* Council will be conducting a new study in 2003-4.

Some other more recent assessments of graduate programs can be found [here](#).

- Complete descriptions of the scoring method and each of the criteria are provided below.
- The weight given to each criterion is shown in parentheses below the criterion. A negative value indicates a criterion that is weighted less than the others.
- Your choices on the previous page determine whether larger or smaller criteria values are better.
- Green cells contain values that are at least one standard deviation better than the mean.
- Red cells contain values that are at least one standard deviation worse than the mean.
